

ARTvertising

Take a package with an ad on it and transform it to a piece of Art. That's the concept of ART vertising.

Designers transform art to ads. A new idea needs to be accepted before it is usefull as product or to help to sell a product. Art makes somthing new and has new ideas, to make new ideas compartible to the marked, that is marketing. Being unique, trendsetting and thinking about the future is different from providing products. Art provides ideas for it's Art and for nothing else, that is the difference to Advertising. There is no ad without art but there is art without ads. To recycle an Ad to art means to turn the process around, that is the concept of recycling a pART of TRA to ART.

TRAdesign starts with TRAsh. A piece TRAsh full of ART is a TRApack,

This magazine is a full package of TRA for you, recycled from the TRAshcan.

TRAsh Redesign
take a piece of find, refresh the colour and bring it back as Art. Recycling stARTs with TRAsh. Turn TRA to ART. Anyway you show the TRAsh you remember the problem, TRAsh takes over the world not itself we TRAsh the world for future! What future?
