Fast and direct is the way this graphics are worked and the massive color is refreshing. The sketches were made with pencils and eddings, on black carton. Photographed, cleaned and retouched, auto retraced, simplified, colors and some lines are added, sometimes. So it is not so very tricky work. It's try and error.

Not so many corrections as errors. Some lucky results from the automatic drawing are included. The layout of this GuckBook is a bit rough and wild as the grafix are. Automatism is surrealizing the expressionism. As I use to say: All art is surreal.

Mostly I took a black background to make the colors shiny. To show the whole work in full size, there is sometimes a black stripe at one side to fill the page. To show the colored edges, some works don't have the full size of the format and are adjusted in the centre.
