

American Horsepower

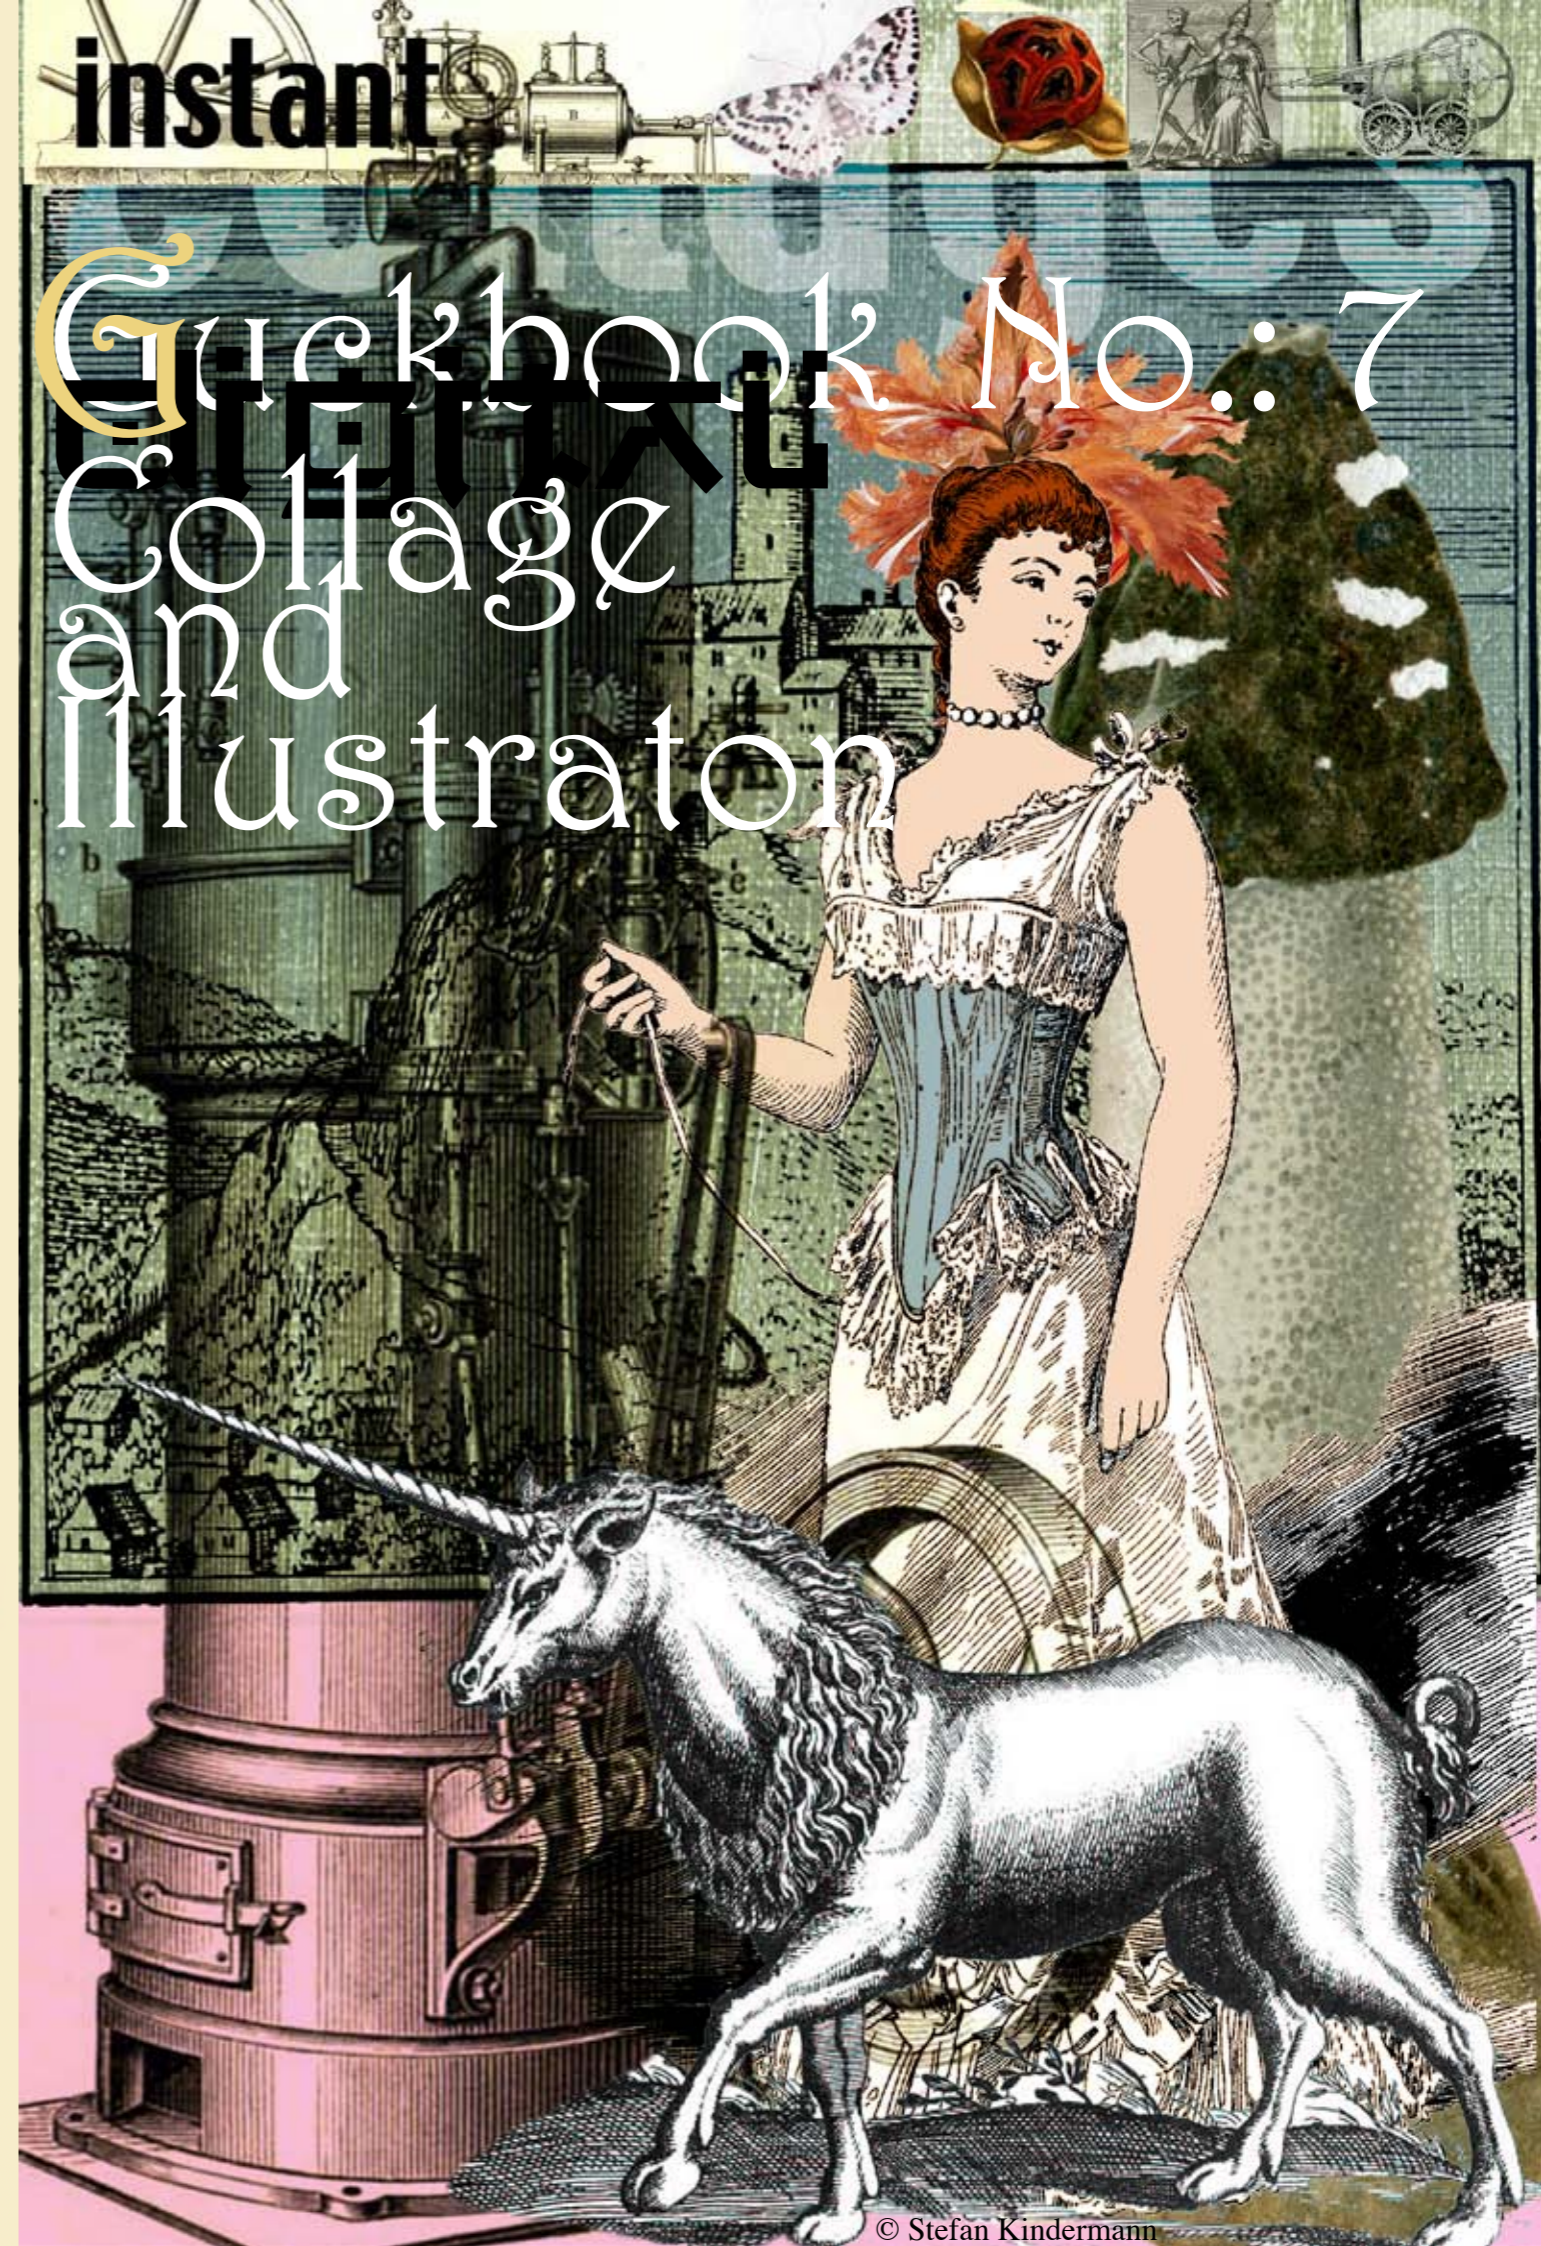

Composing, mixing and illustrating graphic out of different times from different styles is the idea of instant collages. Handling the material fastly and not to think about content or sense of the work makes the image to a self talking subject. The story in those works happens while composing material to a picture. It's some surreal Dada in these images, so they are pointing to some works of Dadamax one of the creators of Surrealism. Some works are expressiv overworked that refreshes the idea of surrealism and leads into an other time, the time of Expressionim. There is no idea or story to tell to these pictures, there is something to discover and having a look for thoughts in our own imagination that can tell a story by ourself. Titles are taken out of the matter I found or they are quick thoughts while doing the works. Enjoy the images, don't think too much about the titles.

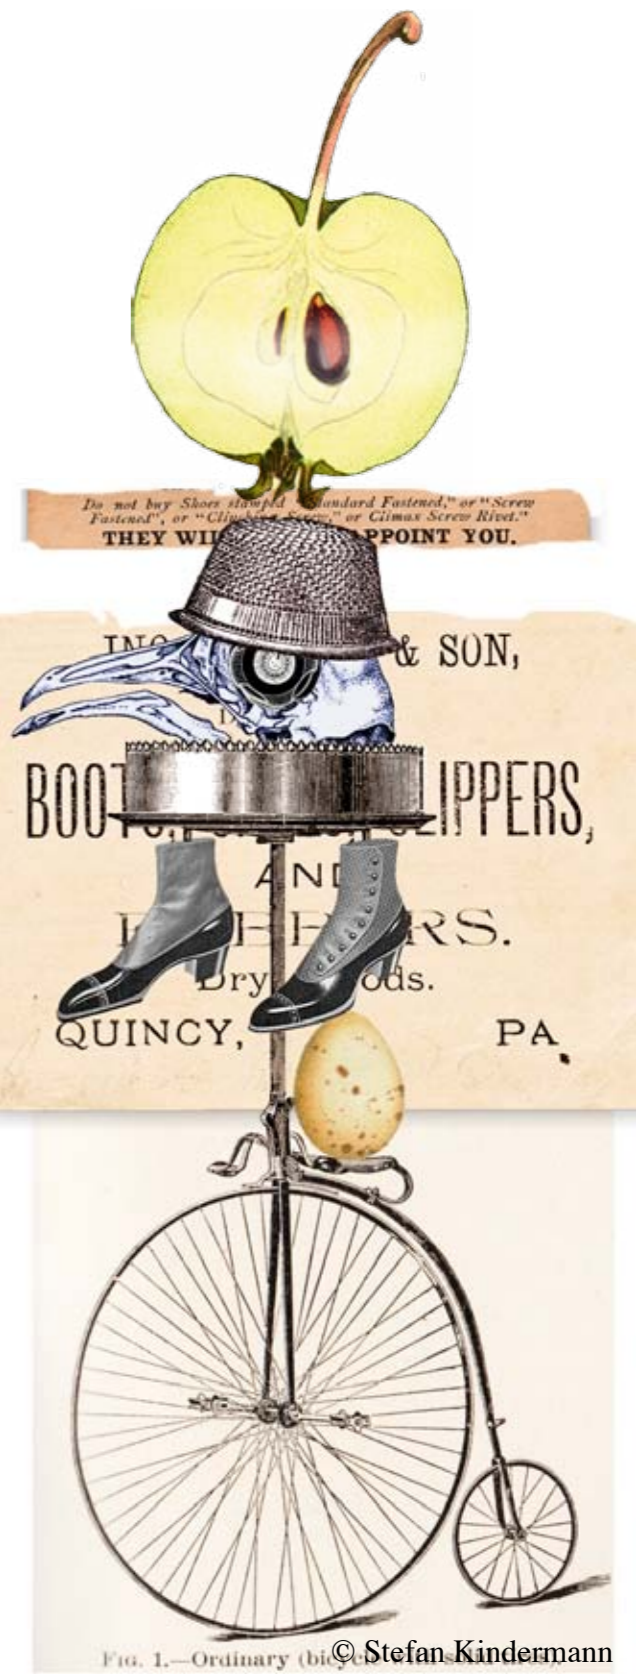

Please don't copy my works out of this artmagazin. Links are welcome and if you want something for publishing ask me for an ok and give some credits to my work.

Hokuerich

CARE FOR A COUGH

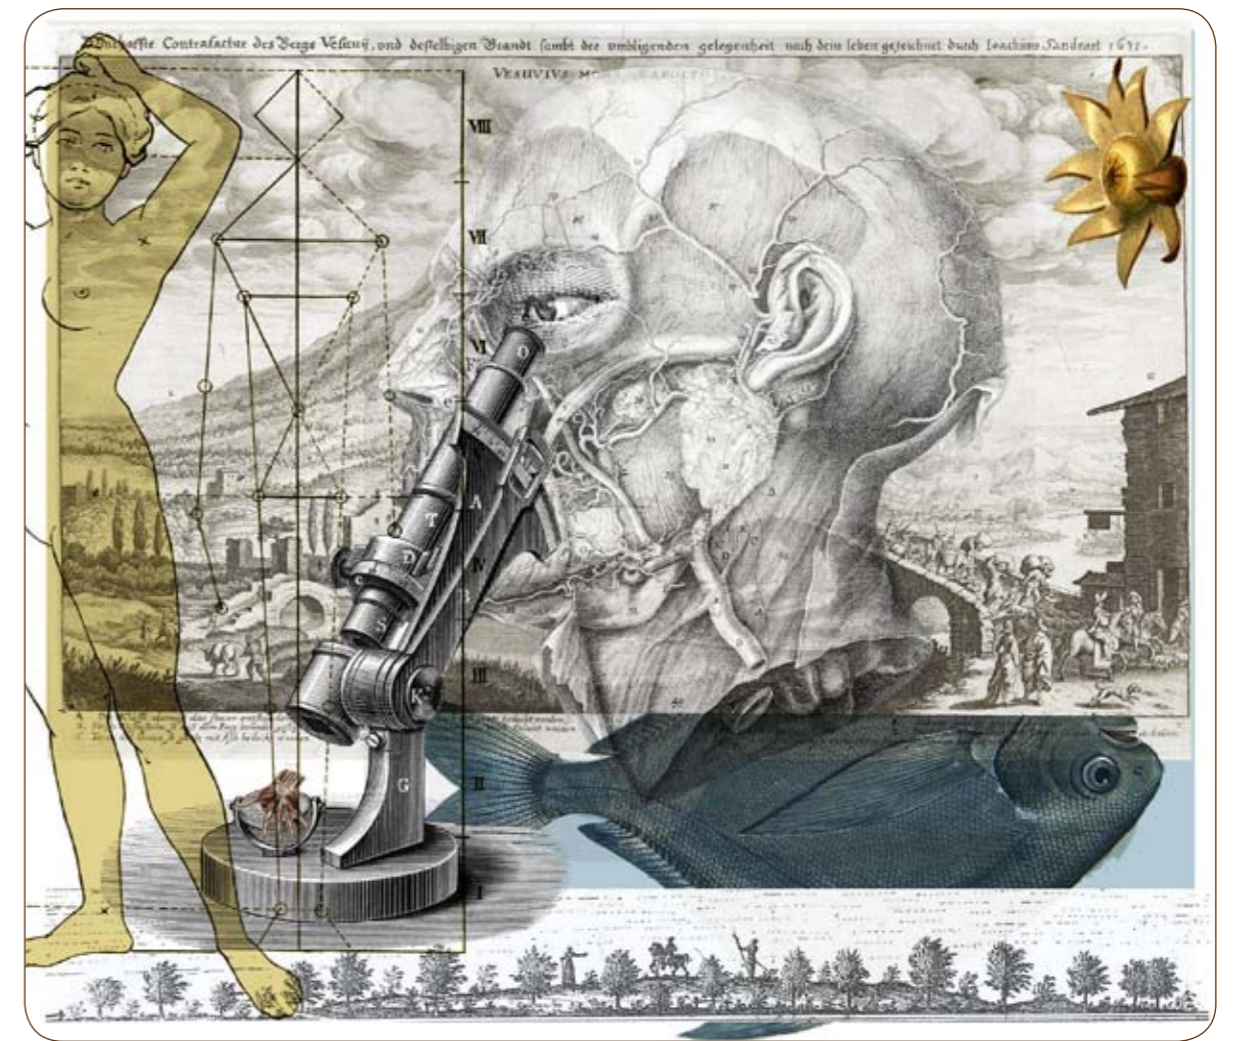

It's some black humour in association with the pregnant doll. The title is a piece of find. Hokuerich is combined from a Hokusai woodcut and a view from Emmerich in the background of the collage as etching. A title that has nothing to say but giving the collage a name.

Diese Fabrik photographischer Instrumente hat sich seit einigen Jahren mit zwei Sorten erobert. Die Stereokamera Helioscop und Rollei-doscop sowie die so überaus handliche Spiegelreflexkamera Rolleiflex sind heute tatsächlich in allen Erteilen bevorzugte Instrumente für hochwertige Aufnahmen. Sind es einerseits die plastischen Stereobilder, die das Wunder des künstlichen Raumes zeigen, so bleiben andererseits die Bilder der Rolleiflex auf hohem künstlerischem Niveau. Die verwendete Optik ist ein Tessar 1:3,8 oder 1:4,5, als heute bekannt garantiert an sich schon vollkommene Aufnahmen, die jedoch erst durch die ungemein praktische Einrichtung der keinen Spiegelreflex mit 100 Prozent Sicherheit scharf gestochen werden. Das ganz neuartige, in seiner Selbstverständlichkeit aber verblüffende Prinzip der Rolleiflex ist die Trennung

fernerhin jeder Fokusdifferenz aus. Außerdem ermöglicht diese Konstruktion die Verwendung des unbedingt zuverlässigen Computerverfahrens (bis 1/25 Sekunde), so daß selbst bei langsamem Handnehmen das Bild weder durch ungewollte Spiegelreflexion noch durch die Erschütterung des Belichtungsmechanismus verwackelt werden kann. Das ist ein sehr große Vorteile die für die Rolleiflex sprechen; als weitere Notwendigkeit für Stereokameras kommt die Verwendung von Rollfilmen hinzu. Es ist sogar ohne Übertreibung das große Verdienst der Firma Brunnen & Johannes, daß sie mit ihren Präzisionsapparaten überhaupt erst die Verwendung des praktischen, überall bei Tage einzulegenenden Rollfilms für Spiegelreflexkameras möglich machte. Das Wort: „Diese Kamera denkt für Sie“ ist eine Wahrheit, die jeder Photograph im Gebrauch dieser Apparate unbedingt bestätigen kann.
